

American Academy of Stem Cell Physicians

AASCP Zoom Lecture March 17th, 7:30pm (EST)

Jeffery Dach, M.D., "Cracking Cancer Toolkit, Using Repurposed Drugs for Cancer Treatment"

Jeffrey Dach MD is founder and medical director of TrueMedMD, a clinic in Davie Florida specializing in Bioidentical Hormones and Natural Thyroid.

Like many people after years in the daily grind of a heavy work schedule, my health eventually declined, and I acquired medical problems of chronic fatigue, aches and pains, and insomnia. Being a physician myself, with 25 years experience with hospital based medicine, I knew that current medical practice using drugs or surgery could not be expected to help. After trying a number of different doctors and clinics, I stumbled on the idea of natural medicine and then began the road back to recovery. As a physician, I found this new body of knowledge fascinating, and I continued to study and attend medical meetings covering this topic of natural medicine.

As of December 2005, I started a new medical practice located at:

TrueMedMD
7450 Griffin Road, Suite 190
Davie, Florida 33314
Office telephone : 954-792-4663
Returning to clinical medicine was easy for me since my original training was in clinical medicine, including working as an Emergency Room Doctor in Illinois. Our office practice specializes in bio-identical hormones, natural thyroid and other natural medicine therapies
